

Annual Field Day Here Oct. 4 -- Schools Innisfail To Crossfield Participate

The high and public schools of Innisfail, Bowden, Olds, Didsbury, Carstairs and Crossfield have arranged to hold their annual Field Day in Didsbury on Friday, October 4th.

For the boys and girls in school this is the athletic event of the year. They are now in hard training. Thirty-eight track and field events will be run off and medals will be awarded the winners of each class.

The support of the citizens of Didsbury is asked in order to ensure the complete success of this important event.

A complete program and time table of events will be printed the week of October 4th.

United Church Makes Appeal

For a small congregation to build a substantial church, and pay for two-thirds of its cost in less than one year, is a work deserving credit. The Building Committee wishes to thank one and all for the gifts of money or labor.

The question now is, can the building be stuccoed this fall? This is all that is lacking to complete the edifice. It is not only a congregational affair but a town institution and a good deal of pride has been taken in erecting this attractive church. The managing board is therefore making an appeal for the last \$900.00 and an every person canvas is to be made to this end. If this sum can be obtained the building will be fully completed and the balance owing taken care of over a period of five years.

Much use will be made of the building this winter.

W.C.T.U. HEAR TALK ON CHILD WELFARE

The September meeting of the Didsbury W.C.T.U. was held at the home of Mrs. E. Reitzel, with Mrs. C. J. Hallman in the chair. The devotional period was in charge of Mrs. Roppel.

Mrs. Hallman and Mrs. Cunningham were appointed delegates to the provincial convention to be held in the First Nazarene Church, Calgary, October 23-4. Mrs. Powers and Miss Crossman favored with a duet.

The main feature of the afternoon was an instructive and educational discourse on 'Child Welfare,' by Mrs. (Rev.) T. E. Armstrong, Olds. The speaker went on to emphasize the need of mothers entering into their daughters' lives as companions. 'The most important work of the W.C.T.U. is among the parents.'

Following a vocal solo by Miss L. Wolff, Mrs. Cunningham spoke briefly on the little white ribboners.

Lunch was then served followed by a social half hour.

Another Mechanics Instructor Added To O.S.A. Staff

The School of Agriculture at Olds will open for the 16th session on October 29 next. The number of applications and enquiries that are being received indicate that there will be a good average attendance again this year. The average attendance for the past three years has been 251, and it is expected that the attendance this year will be very close to that figure.

The courses that are offered are very similar to those that have been taught in the past. The mechanics branch however, is being strengthened. The school is taking on a special instructor in gas engines and farm machinery. The services of this man will be for the purpose of strengthening the mechanics instruction in the mechanics branch of the Agricultural course. With the services of an additional instructor who is especially well qualified for giving instruction in electricity, gas engines and farm machinery, it will enable the school to put on a course that would rank among the highest in the province in these subjects.

The dormitories are capable of accommodating approximately 175 for board and room. Those who apply early and book their reservations for rooms get the preference at the time of registration; however, those who are not able to get into the dormitories, have their accommodation arranged for by the school management, with good homes in the town of Olds. The cost of board and room in the school and in private homes is \$1.60 per day per student.

ter Garbutt's Business College. Miss Evelyn Roper is also attending the same institution.

Mrs. E. Edwards of Seattle arrived in town yesterday to visit with her son, Mr. Dave Edwards.

The weather man seems determined to wipe out his reputation of the past summer. The fall rains if they ever come will be of some benefit to next season's crop even though they are late for this one.

Customer: "No, I simply couldn't wear this coat, it's too tight."

Salesman: "Pardon me, sir, but I've shown you all of our stock now. That's your coat you have on."

Customer: "I'd like to try on that suit in the window."

Salesman: "Why-a-er, sir—we have a dressing-room for that purpose."

SCHOOL CLINIC DOES GOOD WORK IN RURAL DISTRICT

The Melvin school was a scene of much activity on Monday and Tuesday of last week when the Provincial government clinic doctors examined over 125 children and performed 43 minor operations, extracting teeth, tonsils, etc.

The people of that community west of Didsbury were, we understand, more than pleased of the way Dr. Washburn and his assistants carried their work through in such an efficient manner.

The school was turned into a veritable hospital and the children who required medical attention were all put to bed in cots to await their turn. There was no confusion nor tears. At noon nearly all those who had been attended to in the morning were able to go home, making room for those booked for the afternoon. Miss Ruth Hullett, Public Health Nurse, drove 28 miles to bring one family of eight who had no means of getting to the school. On the second day Misses Ruth and Grace Brubacher and Mildred Brown assisted with the nursing. Miss Brubacher was also in evidence with her "taxi" gathering up families.

The Rugby W. I. wishes to thank all those who took part and helped to make the clinic such a success.

Many Subscriptions To The Pioneer Due

By the end of this week a large number of subscription accounts due the Pioneer will be sent through the mails.

This is a semi-annual occurrence and meaning so much to the very life of a newspaper, it can be overlooked if we take up space to relate the fact and stress the need for a hearty response to the "dunners."

Subscriptions are one of the main sources of income of a newspaper. We have well over \$700 on our subscription list now due and payable. Anyone can readily realize what a need there is, therefore, for every subscriber to pay his or her little two or four dollars, as the case may be.

Colored Man: "Boss, de ladies has finally giv' in, ain't they?"

White Man: "Given in? How?"

C.M.: "Well, I just now seen a sign down the street that said: 'Ladies Ready-to-wear Clothes.'"

Developing Sentiment For World Peace

Despatches appearing in the daily papers telling of the rupture of relations between Soviet Russia and China, with raids along the border between the two countries and the imminence of open warfare; despatches reporting the strained relations that have developed between the Jews and Arabs in Palestine, ending in riots and necessitating vigorous military action by the British Government as the mandatory power in Palestine; despatches outlining the difficulties confronting the reparations conference at the Hague, in reaching some amicable and satisfactory solution of the financial problems arising out of the Great War; despatches recording the communistic activities of Soviet agents in all parts of the world,—all reveal how far distant is that day when the nations of the world can rest assured of universal, permanent, world-wide peace.

In his recent masterly address before the Canadian Club, at Regina, Hon. Winston Churchill declared with emphasis and without any qualification, that the greatest need of Great Britain and the Empire today was a long period of world peace. Great Britain, he said, was making wonderful progress. It was more prosperous than ever before, more people were employed, the standard of living was higher, but population was larger, taxation enormously heavy, and a long struggle ahead to wipe out the huge burden of war debt. But, he reiterated, all that was necessary was a long period of peace to enable the Old Land and the whole Empire to re-establish themselves, develop their great resources, and thus enter upon the greatest era in their history.

Mr. Churchill, therefore, urged the Canadian people to do everything to develop a strong sentiment for peace. Such a sentiment existed and was growing stronger every day. Statesmen everywhere were striving for it. But his message was to each and every individual to do their part, to think peace, talk peace, act peacefully. Only so would the nations themselves become peaceful in thought and outlook; only so could statesmen effect those compromises and develop those policies essential to world peace.

Finally, Mr. Churchill confidently predicted that, if such a state of mind was cultivated by the masses of the people, the longed for peace would be maintained. There would, no doubt, be uprisings and troublous times among the less civilized peoples, such as were in evidence in Russia and China, but people should not be misled by these into thinking that general world peace was impossible of realization.

Canada, with its cosmopolitan population, containing, as it does representatives of almost every nation under the sun, has a particular duty to perform. It is clearly the duty of the people of this Dominion, both in the interests of Canada itself, and of the world at large, to cultivate the kindest of feelings toward each other, to refrain from looking down upon their fellow-citizens of other racial extraction as inferior to themselves, to be considerate of their customs and habits.

It is likewise in the interests of Canada, and of world peace, to study international problems, and to resist to the utmost those tendencies to erect walls of division between this nation and that, whether those walls be military, naval, social, or in relation to matters of trade and commerce. It should be the aim of the Canadian people to be friendly with all other people, and, instead of emulating any of them in policies of isolation, exert their influence to the end that cordial goodwill be developed instead of suspicions and antagonisms.

Six Tip Scale At Pound

German Fruit Farmers Have New Variety Of Strawberry

A new variety of strawberry, called "Upper Schlesian," so enormous that six luscious berries alone tip the scale at a pound, is the latest offering of the industrious fruit farmers of the Vierlaenden, near Hamburg. The new berry is perfectly formed, of appetizing rosy hue, with a delicious flavor.

The Vierlaenden, a fertile low-lying district in the vicinity of the river Elbe, is justly famous, for its people have preserved many of their fine fruits and vegetables.

If a boy doesn't earn more than he gets he will never amount to much as a man.

When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been over-stimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tasteless dose in water. It is pleasant, efficient, and

harmless. It has remained the standard with physicians in the 50 years since its invention. It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

New Nickel-Copper Find

Promising Discovery On Manitoba-Ontario Boundary

It is reported that a promising nickel-copper discovery has been made in the vicinity of Ingolf on the Ontario-Manitoba border. Assays show 20 per cent. copper, 1 per cent. nickel and about three dollars worth of gold per ton. Further assay work is proceeding at the present time. It is stated at Ingolf that the find is about 600 feet wide and one and a half miles long, with an outcrop about six miles east. There is a large body of the same mineral on the Manitoba side but it is closed for staking yet.

WEAK, WATERY BLOOD

Is the Cause Of Much Distress and General Weakness

Anaemia — which really means weak, watery blood is responsible for the pale faces, thin cheeks, dull eyes and drooping figures one sees so frequently. It is the chief cause of headaches, weak backs, aching limbs and uncertain health. Every weak, anaemic person should win the right to be well by refreshing thin, weary bodies with the new, rich, red blood so promptly supplied by the use of Dr. Williams' Pink Pills. This new blood reaches every organ and nerve in the body and quickly banishes all those troubles that have their origin in watery blood. Among those who have found new health and strength through the use of Dr. Williams' Pink Pills is Mrs. Elizabeth Evans, Amherst, N.S., who says: "When I began taking Dr. Williams' Pink Pills I was so weak and run-down that I could scarcely go about the house, and found housework almost impossible. I was taking doctor's medicine, but with no apparent benefit. I had often read about Dr. Williams' Pink Pills and decided to try them. Soon I found they were helping me, and under their continued use I regained good health. The pills also completely relieved my son of St. Vitus Dance, so that I have every reason to praise them."

You can get the pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

An Unusual Court Decision

Rules Dust Beneath Floor Is Property Of Hungarian Tenant

The Supreme Court of Hungary decided recently that, although the floor of an apartment belongs to the landlord, the dust collected beneath it is the property of the tenant. The decision is worth \$2,500 to Frau Simon Sichelmann, for the dust over which the case arose is gold dust which accumulated there during the fifteen years that her husband carried on the trade of goldsmith. On his death the widow decided on a floor mining enterprise which her landlord opposed, claiming the dust and floor both as his. Nine pounds of gold dust already have been recovered.

Might Not Be

"One wife too many!" exclaimed Mrs. Henty, as she glanced at the headlines of her husband's paper. "I suppose that is an account of the doings of some bigamist?" "Not necessarily, my dear!" replied Mr. H., without daring to look up.

Nights Of Agony come in the train of asthma. The victim cannot lie down, and sleep is driven from his brain. What grateful relief is the immediate effect of Dr. J. D. Kellogg's Asthma Remedy. It banishes the frightful conditions, clears the passages, and enables the afflicted one to again sleep as soundly and restfully as a child. Insist on the genuine at your nearby druggist.

What's In a Name

Some Arouse Unpleasant Memories As Chinese Very Well Know

Even the Chinese, unemotional as they seem, find that old names now and then arouse unpleasant memories. A thousand years ago Tartar invaders named a city Mankung. The Chinese recaptured it in the twelfth century and named it Yen-Shan-Fu. Along came the Tartars again a few years later and they rechristened it Chung-tu. Then came Kublai Khan, who made it Yenking. After being called Ta-tu and Cambaluc it was named Peking 500 years ago, and clung to this designation until recently. The late revolution gave it a new twist and it is now Peiping, which means "northern peace."

Minard's Liniment—The King of Pain.

W. N. U. 1801

Inventor Of Gramophone Dead

Emile Berliner Also Evolved Telephone Transmitter and Established Milk Standards

Emile Berliner, inventor of the gramophone, the first disc record talking machine, and the telephone transmitter, died recently at his home in Washington, D.C. Mr. Berliner was 79 years of age.

Following his arrival from Germany in 1870, he engaged in various vocations. He sold glue, painted backgrounds on enlarged photographs and travelled as a salesman for a Milwaukee wholesale house.

In 1877 he moved to Washington and began experimenting. While a clerk in a store he evolved the idea of the loose contact transmitter or microphone, which placed the telephone on an advanced commercial basis, some three years after Bell and Watson had invented the telephone in Boston. Later the microphone was to become also the soul of radio broadcasting.

In 1887 he achieved the second scientific discovery that placed his name in the forefront of inventors by giving the world the gramophone. This talking machine utilized the disc record, also his invention, and a horizontal wave groove, rather than the cylinder up and down groove. He invented and perfected, as well, the present method of duplicating disc record.

For his gramophone invention he was awarded the John Scott medal and Elliott Cresson gold medal by Franklin Institute, Philadelphia.

Mr. Berliner exhibited his adaptability in yet another sphere by interesting himself, in 1900, in the cause of the high death rate among babies, which he traced to the dangers of raw milk. He was instrumental in establishing milk standards, which were accepted in modified form by all the large cities of the country.

In his late years Berliner was associated with his son Henry in an advisory capacity for the development of the helicopter—an aircraft capable of rising straight up from the ground.

Minard's Liniment—Used for 50 years.

A Modern Sandoz

Saxson Brown lays claim to being Britain's strong man. He has let motor cars run over his chest and once, when a wheel slipped, it went over his throat. He suffered nothing more than a "sore throat." He can pull motor-coaches filled with people and weighing over three tons, with his teeth.

A driverless motor-car controlled by radio has recently been exhibited.

SHIP YOUR GRAIN

— TO —

McBean Bros.

Crop conditions the world over appear to be unsatisfactory this year, so much so, that we consider higher prices warranted than those prevailing. It is our opinion, given after careful study of the world conditions, that our wheat should be worth today \$2.00 per bushel with considerably higher prices later on.

Assuming that importing countries take 850,000,000 bushels, which is a moderate estimate, as last year they took 927,000,000 bushels, and European crops this year are short of last, we have every indication of a shortage in supplies before another crop is harvested. For this reason we look for wheat to sell at \$2.25 per bushel, barley at \$1.25, and oats at .35c.

By shipping your grain to us you can obtain a substantial advance, and can then hold for a favorable market. Winnipeg, August 15, 1923.

League Has Varied Duties

No Matter Too Large Or Too Small For Attraction

It is astonishing to see what a number of activities are to be credited to the League of Nations. Recently, for instance, it dealt not only with the all-important matter of disarmament. It considered how to "protect young female performers in music-halls and similar establishments." It also discussed the prevention of counterfeit coinage, and suggested measure for discouraging criminals from making and circulating false money. Nothing is too large for the League, nothing too small. Which is as it should be, and does great credit to the League staff and subsidiary committees.

Miller's Worm Powders prove their value. They do not cause any violent disturbances in the stomach, any pain or griping, but do their work quietly and painlessly, so that the destruction of the worms is imperceptible. Yet they are thorough, and from the first dose there is improvement in the condition of the sufferer and a cessation of manifestations of internal trouble.

Shows Big Increase

According to a statement issued by the Alberta Government, dairy production in the province increased over 13 per cent. during the first six months of this year, as compared with a similar period of last year.

Hunters

Take Minard's along for any mishaps in the woods. Good for sprains, cuts, burns and bruises.

Foods Stay Fresh Longer This Way

Covered with Para-Sani Heavy Waxed Paper goods that usually stale in a day or so stay fresh for quite a long time. Try it. Get Para-Sani in the handy, sanitary, knife-edged carton at grocer, druggist or stationer. For less exacting uses get "Centre Pull" Packs in sheet form.

Determining Period of the Year Most Important For Land To Receive Normal Precipitation

Opinion differs as to the period of the year in which it is most important for the land to receive normal precipitation in order that moisture reserves may be adequate for the growing crops. Recently a detailed study has been made of 13 representative districts over the prairies during the last 12 years, and certain conclusions arrived at on the basis of these 156 instances.

Out of 82 occasions, when Fall and Winter precipitation was normal or above normal, in 73 instances fair to heavy stands resulted irrespective of the moisture condition following after, which in 42 cases was below normal. Fall and winter deficiency was made up by above normal spring and summer rains in only 28 out of 74 occasions.

On the other hand, on the 47 occasions when below normal spring and summer rainfall was preceded by above normal fall and winter precipitation, the resulting crops were fair to heavy.

The evidence would seem to point to the fact that, while fall and winter moisture gives no guarantee of a good crop, still it is a most important factor and makes probable a good yield.

An examination of last fall and winter precipitation records reveal that there was need of a rainfall, this spring, considerably above normal if crop prospects were to be regarded in any way as favorable. From September, 1928, to March, 1929, the average rain and snowfall was appreciably less than half normal, not a single weather reporting district receiving its quota.

Coupled with inadequate subsoil moisture came an unusually dry spring and summer, when April was the only month which even approached normal, while the two critical months, June and July, were two-thirds, and a little over one-half of normal respectively.

So far as the present crop is concerned, it required an unusually large amount of spring and summer rainfall which did not come. The results of this lack are now evident.

Farm Loan Payments Soon

Plans For Scheme In Alberta Are Practically Completed

First payments under the Alberta Government Farm Loan Schemes will be made shortly. A large number of carefully selected applications are in the final stages, and loans that have been approved by the Edmonton Board, and the all-Canadian Board at Ottawa, are in the hands of the officials who are preparing the mortgage papers. When all legal points are disposed of the actual cash payments will be commenced.

Why She Was Satisfied

It was necessary for taxation purposes to decide on which side of the Canadian and United States border a farm which an elderly lady had just purchased, actually lay. Surveyors finally announced that the farm was just on the American side of the border. The lady smiled with relief. "I'm so glad to know that," she said. "I've heard that winters in Canada are often terribly severe."

Japan's demands for phonograph records leans largely toward the work of great composers, whereas in China nine-tenths of the records are traditional Chinese tunes.

"Dad, do they charge tolls if the carriage is empty?"

"I don't know. I have never ridden in an empty carriage."—Lustige Kölner Zeitung, Cologne.

W. N. U. 1801

Could Learn From Canada

Australia Would Follow Example Of Dominion In Dealing With Industry

The Bulletin, Sydney, Australia, says:—

Canada doesn't go in for compulsory trade-unionism or basic-wage commissions, or arbitration courts, or anything like that. It believes that the less Government meddles in industry the better for both employers and employees; and as warrant for its belief it can point to prosperous industries, recent wage increases in many trades, low unemployment returns, and comparative freedom from strikes. In 1927 the number of disputes was 79, the number of workmen involved 22,683, and the number of working days lost 165,288. Australia, with its expensive apparatus of industrial tribunals had 441 strikes, 200,757 involved employees, and 1,731,581 lost working days in that same year. In short Canada is beating us badly, and we ought to be too proud to let Canada beat us badly though not too proud to learn from its example.

FLUTTERING LINES

Nothing gives better service or is generally more satisfactory for warm weather wear than tubular printed chiffon cotton voile. It's quite inexpensive too! You'll be surprised at small cost of Style No. 646, if you make it. It is in smart capucine tones so flattering to suntan skins. It comes in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. The double tiers are circular shaped so as to give snug hips. Shirring appears at each shoulder of molded bodice with Vionnet collarless neckline. Navy blue georgette crepe, flowered chiffon, printed lawn in red and white, orchid sheer linen dotted in purple, Nile green rajah silk, chateau green georgette crepe, voile in maize shade, printed silk crepe in bright blue tones and black and white printed crepe de chine are interesting suggestions. Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

To Have New Industry

Western Foundries, Ltd., Building Factory At Lethbridge

The Western Foundries, Ltd., with a capital of \$100,000, has purchased four acres of land in the Canadian Pacific Railway industrial section at Lethbridge. Work has already commenced on the buildings. The company proposes to manufacture high-way machinery, mining and oil drilling equipment, soil pipes, cast iron water pipes, and brass, aluminum and bronze castings. It is understood that supplies of pig iron will come from the Pacific coast, coke from Michel, and moulding sand from the Lethbridge district.

McGinty—I've a terrible corn on the bottom of my foot.

Pat—That's a foine place to have it. Nobody can step on it but you.

Canadian Poultry Pool Faces Unusual Situation This Year Owing To Over-Production

Provincial Turkey Show

Saskatchewan Exhibitors To Have Large Section At Winter Show

The management of the Saskatoon exhibition has promised to provide facilities for a large turkey section, at the time of the annual poultry show to be held there during the coming winter. This will constitute the provincial turkey show, explained Professor R. K. Baker, at a meeting of the executive of the Saskatchewan Turkey Breeders' Association recently.

With regard to turkey exhibits at the World's Poultry Congress, in London, England, next year, the executive expressed willingness to co-operate with the poultry committees in the preparation of Saskatchewan exhibits.

Saskatchewan turkey exhibits at the Toronto Royal this fall, it was announced, will have the advantage of the supervision of the well-known exhibitor, R. H. Stapleton, who will accompany his own birds to the show and who offered to look after the birds of other Saskatchewan exhibitors.

The executive drew up recommendations in regard to banding and inspection of turkeys for submission to the Department of Agriculture.

Growing Turkish Tobacco

The latest experiment in Essex County, Ontario, the growing of Turkish cigarette tobacco, has been a success, early reports indicate. The Turkish plant is showing as good production in this county as in Macedonia, which has been the centre of Turkish leaf culture for centuries.

The Central Company of the Canadian Poultry Pool, Limited, was faced with a situation unparalleled in the history of the Canadian egg industry in the early part of the present year, according to a review of the 1929 egg season, issued by the Saskatchewan Co-Operative Poultry Producers, Limited.

It appeared the season's production was considerably in advance of the consumptive requirements.

Toronto and Montreal had in the past provided a ready market for the greater percentage of the Western surplus, says the review, but this season's production was so increased in those provinces by local production, that an over-supply was soon apparent on the Montreal Market. In consequence the poultry producers had to look for other markets.

Great Britain, the only open market where the provincial producers competed with the world, had been ruling approximately six cents under that of last year, it was stated.

In putting up eggs for export only the best grades can be packed, the statement warns. Eggs affected by heat cannot be exported. Under-grades, such as seconds, pullet extras and cracks, are not wanted in Great Britain.

During the last three months 40 per cent. of the eggs marketed in Western Canada by merchants have been under-grades, says the review, and consequently with all Canadian markets well supplied with high-grade eggs, a market had to be found for the large surplus of under-grades.

The situation was met during April, May and June, by breaking out into Melange, about 50 cars of undergrades, but once the requirements of frozen eggs were supplied under-grades had to go into immediate consumption. The result was over-supply, and it has not been possible to maintain prices.

The Pool has been consistently undersold by independent dealers who have been buying eggs from territory, getting them as low as 11 cents per dozen, and it has not been possible to maintain prices.

The problem facing egg producers in Western Canada, is to eliminate under-grades, and proper feeding rations, it is stated, care in handling and elimination of male birds from flocks would materially assist in solving this problem.

In view of the market situation, the orderly marketing of Pool merchants' eggs has obtained for the egg producers at least five cents more per dozen. Had merchants marketed through independent dealers the markets would have been completely demoralized.

It was believed that the poultry pools of Western Canada, through their central company, the Canadian Poultry Pool, Limited, have accomplished, this season, beneficial results which would have been utterly impossible under any other system.

Canada Will Exhibit

Canada's official participation in the six weeks' British Empire Trade Exhibition, to be held at Buenos Aires in the spring of 1931, has been announced by the Department of Trade and Commerce, Ottawa. The exhibition will be staged in the world famous Palermo Park where the Argentine Rural Society annually stages its stock shows.

Tommy: Did you have influenza as bad as I did? I had to stay away from school for three weeks.

John: I had it worse than that — I had it in the holidays.

"How did you find yourself after Oettersen's party?"

"Oh, I just looked under the table and there I was."—Karikaturen, Oslo.

Welcome Bisley Victor Home

Lieut.-Col. R. M. Blair, champion rifle shot of the Empire, welcomed home on board Canadian Pacific Steamship "Duchess of York," by Dr. A. M. Waylen, immigration health inspector. The trophies won by Colonel Blair are pictured below and are from left to right: The most coveted shooting trophy in the British Empire—the Gold Medal awarded to the King's Prize winner; the Grand Aggregate Gold Cross, also won by Col. Blair, and the National Rifle Gold Badge. He was also presented with a much-prized autograph photograph of His Majesty King George V.

BACK TO SCHOOL

Throughout this community, both in rural and town schools, high and public schools are being thronged with students. They have had enjoyment and rest and now must face the more serious things of life. We wish them every success. This is an age when education is a leading factor to success in almost every calling in life, and the boy and girl who neglects making the very best of his or her opportunities will have much to regret in after years. Today education is within the grasp of all and it needs to be more appreciated. Good schools, such as exist all over, are an asset to every community. Their successful operation, however, does not fall alone to the lot of the teachers. Parents must co-operate, and one cannot help but think when looking over examination results the sometimes appear to be disappointing that a little parental help and co-operation might have helped a great deal.

Our schools are substantial and well conducted, but success can only be attained by co-operation between parents and teachers, linked with a determination on the part of the pupils to study and make use of opportunities. That being so, success is certain.

With school fairs in full swing the youngsters are getting an opportunity to demonstrate their prowess in farming matters. The institutions are deserving of whole-hearted support from the adults of every community.

NEWSPAPER BEATS RADIO IN ADVERTISING

Newspaper advertising proved more valuable than radio advertising by a ratio of 22 replies to one for a recent announcement of the Babson Statistical Organization using both media. Roger W. Babson, business statistician and forecaster, told a lecture audience in Cleveland on May 27.

One newspaper advertisement published in five cities at a cost of \$3,000 brought 222 replies to every one reply broadcast over the Columbia Network. Mr. Babson said.

The broadcast was from 2:30 to 9 p.m., Saturday, May 18, Mr. Babson said. A well-known orchestra was used as the entertainment feature and there was a five-minute talk on the Babson Service. The result was 16 inquiries and two telegraphic orders.

The newspaper advertisement appeared on the following Monday in newspapers in Cleveland, Boston, New York, Philadelphia and Chicago. It drew 4,000 inquiries, of which 488 came from New York. Figures presented by Mr. Babson showed that each reply from the radio cost \$160.60, while those from the newspaper ad. cost 75c each.

A visit to the Exhibition park west of town is well worth while at this season of the year. The butte and surrounding landscape presents a lovely view with the trees and shrubs decked in their glorious autumnal colors. The exhibition board performed a wise act in having the board fence erected to prevent thrill-seeking automobilists from driving down or up the west side of the butte. It seems as if the automobile is wedging its way into everything—let alone the pedestrian.

LOCAL & GENERAL

At the home of Mrs. Berscht on Thursday, September 26, a 25-cent tea will be served from 3.30 to 5.30, in aid of the building fund of the Evangelical Church.

There will be a Radio service in the Anglican Church at 7:30 p.m., Sunday, September 22. The service will be broadcasted from Calgary.

David G. Phillips' most sensational novel, "The Grain of Dust"—with Ricardo Cortez and Claire Windsor, at the Didsbury Opera House, Saturday, Sept. 21.

Mr. H. Carrington of Calgary, better known as Spunk Sparrow, was a visitor in town last week and while here paid a visit to the Pioneer office to renew his subscription.

Miss Enith Hunsperger left on Sunday last with Mrs. V. Shantz to spend a week at the latter's home in High River. Mrs. Shantz has been visiting in town for a few weeks with relatives and friends.

WHAT OTHER EDITORS ARE SAYING**CHEMICAL WEED DESTROYERS**

Experiments being conducted with chemical weed killers by the Departments of Agriculture in the provinces of Alberta and Saskatchewan during the present season will be watched with a good deal of interest. While the products of a number of companies are under test and the results obtained from each will be reported, it can be taken for granted there will not be a great deal of variation between them. The results to be most fervently hoped for is the establishment of the practice as one sound and practical.

The successful destruction of small patches of weeds by the application of chemicals has been accomplished in previous seasons, but the present year marks the first real attempt on the part of a financially disinterested agency to compile data the farmer can accept as authentic. In doing this work the Departments of Agriculture are therefore engaged in a valuable service.

Since these experiments will be studied by hundreds of farmers and will be the guide in the expenditure of thousands of dollars in the following season, the departments concerned will of course make a full report on the results obtained with each product. They can also be expected to have some figures on the cost of application per square yard or square rod, for this is one of the vital considerations.

Where weeds exist in small patches, along fence lines and in other areas which cannot be cultivated, chemical killers can be used to great advantage. It is to be hoped the present season will definitely establish them as a valuable weapon in weed control work.—Western Farmer (Calgary).

It is estimated that the Dominion government will be ready to inaugurate its new Western air mail service by November of this year. Meanwhile its air experts are busy at the task of arranging beacon lights for the planes which will use the Winnipeg-Calgary-Banff route for the forwarding of fast mail by all night flying. In the matter of air mail service the Dominion is making rapid strides.—Calgary Herald.

ITEMS OF INTEREST

Eighteen school districts in Alberta have been empowered to borrow a total of \$52,500 to effect improvements on present school buildings and construction of new schools, according to an announcement by the provincial government. The highest amount to be borrowed by a school is \$5,000 and the smallest is \$700.

Ratepayers of Olds, Saturday, September 7th, sanctioned a by-law for the building of a much-needed new school.

A total of \$6,000,000 is now invested in Alberta Wheat Pool elevators, and with the completion of a new elevator at Warwick, north of Vegreville, for which a contract was let Wednesday last, the number of elevators operated by the Pool will be 438, with a total capacity of 16,580,300 bu.

Brett, pioneer physician of the west and for ten years Lieut.-Governor of Alberta, passed away in the Holy Cross Hospital, Calgary, late Monday evening, at the age of 78 years. The funeral is being held today at Banff.

More than 2300 miles of copper wire lines will have been erected by the Alberta Government Telephone system by the time the season's construction program is completed. Most of the new construction has been on toll lines of which 1,851 miles have been built or building. New exchanges have been opened this year at several points the largest of which is the main central station at Calgary which will not be completed until sometime next year. Considerable underground construction has been done in cities.

Church Announcements

LUTHERAN CHURCH

Westcott 10.30 p.m. German.
Didsbury 2.30 p.m. German.

Continuing with the series on the Lord's Prayer the pastor will treat the second petition taking as his subject: The Father's Kingdom.

Confirmation instructions to be given through the medium of both the English and the German languages as well as religious instruction for the smaller children on Saturdays will be resumed with the beginning of October. Since a two-year confirmation course has been inaugurated those wishing their children to be confirmed this coming year and a year hence are asked to make their registrations. Registration should be made before October 1, since deferred registrations not only cause annoyances, but also hinder the progress of the class.

"Ye fathers, provoke not your children to wrath: but bring them up in the nurture and admonition of the Lord." Eph. 6:4.

THE FORD CAR REAR AXLE

Expense no object in Achieving Perfection

THE rear axle of the Ford car is of the three-quarter floating type with spiral bevel gear. The pinion hub is exceptionally heavy, and, as the pinion is carried on double taper roller bearings, perfect alignment of the gear is always assured. The rear axle has a total of four roller bearings which add considerably to the cost of manufacture but are a protection for the owner against wear.

Special care is taken to insure silence in the pinion and ring gears. These are made up in sets and carefully matched, each set being run in to eliminate all possibility of noise in operation.

The differential side gears are forged integral on the rear axle shafts and the teeth then cut. This permits of lighter and more simple construction. The shafts are unusually strong, and, as the centre line of the wheel comes over the bearings, there is no overhang of the axle shaft, and it has no weight to support.

The use of malleable castings is eliminated in this new axle housing which is made entirely of steel. Bell forgings welded to steel tubing make up the shaft housing which is bolted to an all steel differential housing. The care and skill devoted to the manufacture and assembly of rear axle parts is typical of the high standards of Ford engineering.

WORLD HAPPENINGS BRIEFLY TOLD

Flying officer W. W. P. Stewart, of the Royal Canadian Air Force, has been transferred from Jericho station to the Winnipeg service.

Fifteen persons were drowned when the Spanish steamer "Ogono" and the British tug "King's Cross" collided in the North Sea 30 miles off the Humber.

Warren Packard, 35-year-old heir to the Packard millions, was killed when his private seaplane crashed into a marker in a marsh near Grosse Point, Mich.

Information of the system of education for Japanese girls was discussed by representatives of public and private girls' schools throughout the Empire in a recent three day conference at Tokio.

A regular Arctic mail service between Fort McMurray, Alberta, and Akavik, Northwest Territories, via northern trading posts, will be inaugurated early in November, according to an announcement by Hon. Peter J. Veniot, postmaster-general.

A Power Of Its Own. Dr. Thomas' Electric Oil has a subtle power of its own. All who have used it know this and keep it by them as the most valuable liniment available. Its uses are innumerable and for many years it has been prized as the leading liniment for man and beast.

New Breed Of Sheep

A new breed of sheep, specially adapted to find a living on poor land where some breeds would be unable to subsist, and at the same time yielding a good 10-pound fleece of high quality wool, was exhibited by Leeds University at the recent Royal Show, held at Harrogate, England.

Her Little Boy Was Very Ill With Summer Complaint

Mrs. Ray Fisher, Lebrét, Sask., writes: "For over a month, last summer, my little boy was suffering from summer complaint. He got so bad there began to be traces of blood in his stool, and anything he ate would not stay on his stomach very long. He became so weak he could not stand up. A neighbor recommended

"Discouraged and in despair I sent for a bottle, not expecting any more benefit than from the many other medicines I had used, but to my surprise I noticed a change after he had taken a few doses, and before the bottle was half used he was the same happy, healthy boy he was before he took sick."

An Unusual Church

Building In Copenhagen, Denmark, Is Shaped Like Gigantic Organ

Scattered throughout the civilized world are churches of varying degrees of beauty—some small, some large and lofty, some with towering spires, others with beautiful domes, of exquisite glass windows—but perhaps the most unusual and original church in existence today is to be seen in Copenhagen.

To begin with, this church has been constructed entirely as a memorial to N. F. S. Grundtvig, a preacher greatly admired and respected in Denmark; but it is the design of the building that is so attractive. The whole edifice is shaped like a gigantic organ outlined against the sky, and at first sight is almost overwhelming. One almost expects to hear music coming from the pipes that constitute the roof of this wonderful building, so natural is the effect.

Whilst on the subject of Copenhagen, another curious sight to be seen in the city is a tower that rises above the Church of Our Saviour. This remarkable tower is 288 feet high, and is built like a corkscrew, round which are steps, on the outside, leading to the top! This tower was built in 1696, and has long been a special feature of the city.

Another Problem Solved

Missionary Wants Used Razor Blades For African Natives

What do you do with your old razor blades? Some people use them up for sharpening pencils, but there is a limit to the number of pencil sharpeners one requires. Others simply allow them to accumulate, to the annoyance of their women folk.

But the blades which are a nuisance over here may be valuable in other lands. Some months ago a well-known missionary asked for used razor blades, which could not be disposed of otherwise, to be sent to him and he collected about 300,000 of them.

These blades are much prized by the African natives among whom this missionary works, and in one fifty-a-side football match recently it was found that they were the popular choice as prizes for the winning team.

RECIPE FOR SWEET DESSERT

For those who like a sweet dessert at the end of the meal, this recipe will have a particular appeal.

Butterscotch Pie

- 1 cup brown sugar.
- 2 tablespoons butter.
- 2 tablespoons flour.
- 2 egg yolks.
- 1 teaspoonful salt.
- 1 teaspoon vanilla.
- 1 Cup Borden's St. Charles Milk.
- 1/2 cup water.
- 2 egg whites, beaten stiff.
- 4 tablespoons granulated sugar.
- Baked pastry shell.

Beat together the brown sugar, butter, flour, egg yolks and salt. Add the milk diluted with the water and cook in a double boiler until thick. Add the vanilla, cool slightly, and pour into the pastry shell. Cover with a meringue made with the egg whites and the granulated sugar. Brown lightly in a very low oven.

The Newest Skyscraper

New York Building Almost Equals Height Of A Mountain

It is extraordinary to reflect, writes "Looker On" in the London Daily Chronicle, that the new building to be erected for a bank in Wall Street, New York, will be only 160 feet short of the height of a mountain! With its 63 storeys and its total height of 840 feet, this lofty erection should be one of the sights of the world. Britain's most elevated spire, that of Salisbury Cathedral (merely 400 feet) quite pales into insignificance thereby, and the distance from the ground to the cross of St. Paul's would have to be added to the height of Egypt's Great Pyramid before it equalled that of the New York giant.

The most expensive animal to keep in activity is the walrus. Its food bill is \$2,000 a year—a sum which would supply three elephants with food during the same period.

A Youthful Steward

Fifteen-Year-Old Boy Is Serving On Graf Zeppelin

The youngest member of the Graf Zeppelin crew contemplates the world through serious eyes and believes he may grow up to be a good "airshipman," if he studies hard. His name is Ernst Fischbach, 15, and he shipped aboard the dirigible April 10 as a steward.

"I always wanted to be a steward, he said, 'but now I may become an airshipman if I study.'"

Ernst was aboard the Graf Zeppelin last spring when damaged motors compelled Dr. Eckener to turn back. He is small, with an unusually serious face for a youngster.

Some of the earliest clocks had no dials. Only the hourly strikings told the time.

Old Settler Deported

Violated U.S. Immigration Laws Unknowningly Several Years Ago

John Donaldson Ross, Scottish dairy expert, who unwittingly violated the immigration law quota by moving into Willow Glen, Montana, from Canada several years ago, was deported back to Scotland, on the liner Adriatic, despite all the efforts of the Anaconda Copper Co., his employers, to keep him here.

With him went his wife, born in Scotland, but reared in Canada and his two small daughters, one born in Canada and the other in the United States.

They arrived at Ellis Island after a long trip across the country from Montana, aboard a special train filled with other deportees, many of them recruited from penitentiaries and asylums. Ross came from Scotland to Canada eight years ago. There he married, and one daughter was born to the couple before they crossed into Montana.

Somebody informed immigration authorities that Ross was living in the United States in violation of immigration laws, and he and his family were ordered deported. Ross was not even permitted to back to Canada.

Historic Apartment

Has Been Preserved

Room In London Where Y.M.C.A. Was Founded 85 Years Ago

It is just a little more than 85 years ago since Sir George Williams, then a humble shop assistant, founded the Young Men's Christian Association. He held the first meeting in his bedroom, which is now above a big drapery shop in St. Paul's Churchyard. The room and his table are preserved intact, for when rebuilding was in progress, the structure was lifted bodily from a lower floor to its present position. Pilgrims from every part of the globe visit the historic apartment to pay homage to their founder. The association later engaged a room in a coffee house for half a crown a week.

Bartholdi's Statue of Liberty was presented to the United States at Paris, July 4, 1884.

Sea Scouts being taught some secrets of Navigation by Chief Officer Poole of the Cunard Liner "Antonia."

WINDOLITE

The Improved Glass Substitute

MADE IN ENGLAND

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 135 to 140 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

The Singing Fool

By HUBERT DAIL

Copyright, 1923, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, the singing waiter and song writer at Blackie Joe's New York night club, is discovered by Marcus, the famous Broadway revue producer. Molly, the ballad singer at Blackie's, who had treated Al disdainfully, makes up to him when she finds he is on the way to fame. They are married and Al, and John Perry, Al's best friend, become a famous revue performer. Meanwhile, Grace, the cigarette girl at Blackie's, who loved Al without his knowledge, is left behind. Molly and John Perry, Al's best friend become interested in each other, but hide their feelings. One night Molly tells Al she is going to have a baby. He is overjoyed, but she is angry and resentful, believing her career will be spoiled. Al comforts her, telling her she will love the baby when it arrives.

CHAPTER XI.

The months passed; the time approached for Molly's baby to be born. During that period she was kinder to Al, and more solicitous of his welfare. And, somehow, she and Al did not see John Perry so much. Perry seemed to be called out of the city a great deal of the time on business.

Al went about his work in a daze of happiness. At home was his lovely Molly, quiet-eyed, soft-spoken, patiently waiting. Undoubtedly the mystery of the approaching event had changed her for the better and, as Al predicted, she too wanted the baby.

Then the night came when she was rushed off to the hospital, and Al paced the white corridors, sat down in the reception room, tried to read the dog-eared magazines he saw lying about, smoked countless cigarettes and—waited for the good word. Occasionally a white-robed nurse passed, giving him a sympathetic glance. Then the moment came when one of these nurses beckoned to him. He sprang forward.

"You may come now, Mr. Stone. The baby's born."

"How is it, what is it?"

"It's splendid—it's a boy."

"And how's Molly?"

"She's splendid, too."

Al tiptoed softly into the white room, behind the nurse. There was Molly, bolstered up slightly by pillows, paler than he had ever seen her before. She gave him a wan smile. And lying beside her was a small bundle, which suddenly gave off a high, piercing yell. Al stepped over, ever so cautiously, until he stood beside the bundle. Then he looked down into the wrinkled, red little face.

"Isn't he beautiful! He's a boy!"

While the nurse quickly slipped her hand over her mouth to hide a broad smile, Al leaned over Molly and kissed her gently. He felt out of her arms go weakly about his neck.

"Are you happy?" she whispered.

"Oh, so happy! You're both of you just wonderful!"

"Yes? I—I'm happy too," murmured Molly, and suddenly she began to cry. Al was astonished, but he patted her lovely golden hair, and repeated, "There, there," and dried her eyes for her.

In after years Al looked back on that night as the time when he and Molly were closest together; when she seemed to create a rare and delicate intimacy between them. But as the days passed she grew fretful and impatient to be back at her work. She questioned Al constantly as to whether he was sure Marcus would welcome her back in the show, and as to whether the crowds would remember her as their favorite ballad singer. Each time the subject came Al ardently reiterated that she had nothing to fear. Why, wasn't she the best little heart-throb singer in the whole world? Surest thing she was!

Molly was enraptured with the baby at first, but as the time approached for her reappearance on the stage her interest in Junior seemed to diminish. Her old feeling of cold, calculating ambition returned to her.

Then came the night when she was to face the footlights again. Al, standing in the wings, saw her advance within the semi-circle of bright lights, raise her hands and clasp them across her heart in a characteristic way, and smile her usual friendly little stage smile. When she broke into song Al was singing with her from the wings, and the faintest hint of his encouraging murmur reached her.

Then his thoughts turned to Junior at home, Junior sleeping calmly in his crib, with one podgy fist thrust against his mouth. Suppose, thought Al, Junior were to cry and the nurse didn't know what to do for him. It was all Al could do to keep from dashing from the theatre and driving home post haste.

But no, if he did that Molly would say he thought more of the baby than he did of her. She was saying that too frequently already. Al adored his child as he had never loved another human being, not even Molly. He would sit with the baby in his arms, crooning to it, singing to it, talking to it, by the hour.

Molly noticed his constant devotion to Junior, and, while she had liked it and felt flattered by it at first, she grew more critical as time went on.

"Al, you don't pay any attention to me since the baby came."

"Oh, I do so."

"No, you don't."

"But Molly, he's our baby. Any attention he gets is for you, too. Don't you see?"

Molly didn't see. She shook her head vigorously.

But Junior grew more roly-poly and healthy without being the least bit aware that he was causing a slight feeling of dissension between his parents. He had Al's happy-go-lucky, fun-loving nature and his greatest joy, as time went on, was to have his father sing to him. So two years passed and Junior was able to strut about the apartment, although a bit unsteadily at times, and to go for the shortest of walks in the park.

Meanwhile, the fame and fortunes of Junior's father and mother grew to far greater proportions than they had assumed before his arrival. Al Stone had become Broadway's premier song writer, and as his fame increased he insisted that Molly Winton keep pace with it. She sang all

his songs and he insisted that her photograph appear on every one of the music sheet covers and that her name appear in type twice as large as his own name.

Yet a close observer would have seen that Molly wasn't happy. She had fame, money, a happy home, an adoring husband and a beautiful child, yet something seemed to be missing. Frequently she was moody at home and sharp with Al. But Al loved her so and was so happy with Junior that he passed over these temperamental outbursts.

John Perry had called more frequently after Molly's recovery and return to the stage. He often dropped in at the sumptuously furnished Stone apartment and every so often he took Molly to dinner when Al was busy with a song that had to be finished in a hurry.

At Blackie Joe's place, just off the Village, Grace Farrel heard news of Al and Molly as it percolated down from Broadway. When she learned of Al's baby there was a little sharp pain in her heart for a moment, then she smiled radiantly and dashed out to send him a congratulatory telegram. So Al and Molly had a baby! Grace wondered what it was like and longed to see it.

One day Grace was walking on the Avenue, window-shopping and dreaming, when she saw Molly's face at the window of a blue Rolls-Royce. Just then the Avenue lights went red and the car drew up at the corner to wait for the cross-town traffic.

Now Grace saw a man sitting beside Molly—a stranger. Grace stopped, fascinated by the sight of the richly dressed Molly, superb in delicately applied make-up and a chic little Paris hat. Without thinking, Grace looked down at her own clothes. They were not shabby, but they looked poor beside Molly's gorgeous raiment.

Then a strange thing happened. As the driver of the Rolls-Royce prepared to start his car with the change of lights, Grace distinctly saw the dark handsome man beside Molly slip his arm casually and possessively about her. As Molly turned to him with a smile the car darted away, while Grace stood rooted to the spot in amazement.

(To Be Continued.)

Ancient Tree Destroyed

Five-Hundred-Year-Old Elm In England Prey To Fire

An elm tree 500 years old, at Hadley Wood, Barnet, under which Bishop Latimer preached in 1535, has been destroyed by fire. The blaze started among dead leaves in a cavity in the trunk. The tree, which was of enormous girth, was said to have been one of the largest elms in the country. Henry VIII., when on his way from Hatfield House to London, heard Bishop Latimer preaching under it.

Internally and Externally It Is Good.—The crowning property of Dr. Thomas' Electric Oil is that it can be used internally for many complaints as well as externally. For sore throat, croup, whooping cough, pains in the chest, cold and many kindred ailments it has qualities that are unsurpassed. A bottle of it costs little and there is no loss in always having it at hand.

A Notable Record

In 1882, Arthur Hawkes tells in an article in the Winnipeg Free Press, Brandon had seven lawyers. Four, Clifford Sifton, Arthur Sifton, Thomas Mayne Daly, and George R. Coldwell became Cabinet Ministers, and two, W. A. Macdonald, and A. Henderson, judges in British Columbia. That record can hardly be beaten in Canada.

Why suffer from corns when they can be painlessly rooted out by using Holloway's Corn Remover.

Sir William Morris, Great Britain's leading automobile manufacturer, told the press that every foreign car imported to the British Isles means the loss of a year's work for one Englishman.

Britain's Atlantic Fleet

Finest Naval Unit In Existence and Largest In World

The Atlantic fleet becomes the greatest single fighting force in the world by the decision of the admiralty to recall five battleships of the Queen Elizabeth class from Mediterranean waters to home ports and the Atlantic fleet.

The transference of the battleships, not only an important change in distribution of the navy, but an entirely new departure in British naval policy, means the balance of power is removed from Malta and Gibraltar to the Atlantic.

The Atlantic fleet will consist of 14 capital ships, among them the two most powerful vessels in the world, the Rodney and Nelson, and the largest battle cruiser in the world, H.M.S. Hood.

The Queen Elizabeth vessels are approximately 30,000 tons, armed with eight 15-inch guns. These five will join the two Nelson class vessels, the Hood, the four Iron Duke battleships, and the battle cruisers Renown and Repulse, to make the most formidable fleet assembled on peace time duty in the world.

Officially the lack of adequate harbor accommodation is the reason for removal of the battleships. But there is more behind the decision than a mere question of detail. One suggestion is that the Admiralty is influenced by the fact that these big ships will now give the British dockyards a great deal of maintenance work to compensate for the loss by reduction of the replacement program.

The British fleet in the Mediterranean will be cut to five capital ships and four of the newest "Washington" 10,000-ton cruisers.

Little Helps For This Week

"And the Lord shall help them, and deliver them, because they trust in Him."—Psalm xxxvii. 40.

Be bounteous in thy faith, for not misspent

Is confidence unto the Father lent; Thy need is sown and rooted for His rain.

His thoughts are as thine own; nor are His ways

Other than thine, but by their loftier sense

Of beauty infinite and love intense. Work on. One day, beyond all thought of praise,

A sunny joy will crown thee with its rays; Nor other than thy need and recompense.—George Macdonald.

Have faith in God, think noble things of God; be sure that trust in the righteous God means the ultimate triumph of good over evil.

—Frederic W. Farrar.

Stop Colds with Minard's Liniment.

Owens Property In New York

Valuable Real Estate Is Held By King George

Among the owners of valuable real estate in New York is King George V. of England, it is revealed by the Associated Press. Several Fifth Avenue sites and plots of land elsewhere in Manhattan Island are held by the British crown.

Among them is reputed to be the site on the avenue, of the shoe store which has "the largest round window in the world"—a cylindrical sheet of glass completely encircling a showcase floor which is lowered like an elevator to the basement to be trimmed and then lifted again hydraulically into place.

All the properties of the British monarch are in the custody of a holding and management corporation downtown. It frequently adds to or disposes of this or that other realty under its care, but never makes public the owner's name, and thus keeps secret the exact locations here of the holdings of its royal client.

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mother Graves' Worm Exterminator, an excellent remedy.

Can Be Relied On

The same engines and boilers which British engineers installed in the "Mauretania" in 1907, drove the ship across the Atlantic on her record trip recently. The British workman is always reliable and thorough.

Kill that corn with Minard's Liniment.

Chew and Grow Thin

You know that certain foods furnish body energy without adding uncomfortable fat.

Sugar is one of these foods, supplying needed energy in concentrated form.

WRIGLEY'S gives you sugar and flavor. These ingredients dissolve in your mouth.

What pleasanter way of taking sugar?

Big Job Ahead

One Man Starts Work On Millions Of Books In British Museum

One lone man is working on the job of renovating the 20,000,000 books in the British Museum, in London. For the past fourteen years he has been rehabilitating the dusty volumes in this world famous museum, and there are only 19,790,000 more to fix. If his present rate of progress continues, he will complete the task in just 1,329 more years—unless somebody publishes another book in the meantime.

SAVE THE CHILDREN

In Summer When Childhood Ailments Are Most Dangerous

Mothers who keep a box of Baby's Own Tablets in the house may feel that the lives of their little ones are reasonably safe during the hot weather. Stomach troubles, cholera infantum and diarrhoea carry off thousands of little ones every summer, in most cases because the mother does not have a safe medicine at hand to give promptly. Baby's Own Tablets relieve these troubles, or if given occasionally to the well child they will prevent their coming on. The Tablets are guaranteed to be absolutely harmless even to the new-born babe. They are especially good in summer because they regulate the bowels and keep the stomach sweet and pure. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A Creditable Record

A Sussex lady who recently celebrated her hundredth birthday received a medal from the British Red Cross Society for her War services which included sewing over 400 shirts for the men at the front.

From Mother of Six

"I think Lydia E. Pinkham's Vegetable Compound is wonderful! I have had six children of which four are living and my youngest is a bonnie baby boy now eight months old who weighs 23 pounds. I have taken your medicine before each of them was born and have certainly received great benefit from it. I urge my friends to take it as I am sure they will receive the same help I did."

—Mrs. Milton McMullen, Vanessa, Ontario.

GET READY FOR THE SCHOOL FAIR AT COMMUNITY

Wednesday, September 25th is the big day for the seven schools east of Didsbury, the day of the School Fair to be held at the Mountain View Community Hall. A program of sports has also been prepared, there being 25 events. All exhibition entries must be at the Hall by 10 a. m. the day of the fair. Bring your lunch baskets for a picnic lunch. Below is a list of the special prizes:

The following five prizes donated by the East Didsbury U.F.A.: \$2 for best pig; \$2 for best pair chickens; \$2 for best pair turkeys; and \$1 for best chicken coup.

\$2 for best colt (Percheron) donated by W. J. Fulkert.

\$2 for best colt (Suffolk Punch), donated by Mr. Burns.

\$1 for best sample threshed wheat, donated by Ed. Liesemer.

For best iced layer cake, 2 1/2 lb. Tin Magic Baking Powder, donated by E. W. Gillett Co., Ltd.

\$2 for best beef calf donated by A. R. Kendrick.

\$1 for best pair geese, donated by Lone Pine U.F.A.

\$1 for best sample of penmanship from each class as listed, donated by Lone Pine and Didsbury U.F.A.

50 cents for best sample of each group of vegetables as listed, donated by Lone Pine and Didsbury U.F.A.

1 Pair Headlight Overalls, for boy or girl obtaining most points in the sports, donated by J. V. Berscht.

\$500 Life Insurance Policy (first premium paid) for boy or girl obtaining greatest number of first prizes, donated by Fisher & Edwards.

GLIMPSES FROM THE PAST

15 YEARS AGO

The Didsbury citizens band, 20 strong, under the leadership of conductor Gathercole, was engaged for the Innisfail fair last week.

Twenty members of the Rifle Association attended practice at McNaughton's rifle range on Saturday afternoon last. Efforts are still being made to secure a range closer to town.

10 YEARS AGO

Miss Stella Devolin returned from Calgary last Thursday after a three weeks' visit with friends and relatives.

P. H. Longstaff of Winnipeg, paid a visit with his old friend, Jim Phillipson, for a few days last week.

Alf Hardy, son of Mr. and Mrs. Wes Hardy, who was a corporal in the air service in England and who returned home a short time ago, brought with him some very fine aerial photographs which he took himself.

A Scotsman went into a lavatory in Glasgow to wash his hands. Seeing the sign, "Tip the Basin," he indignantly walked right out.
